About Ragno Travertino Collection

Continuity of tones and textural movements for custom-designed rooms, where the combination of different patterns and 3D structures finds maximum expression in coordinated and versatile designs. The thin, large Realstone_Travertino slabs make it possible to clad worktops and functional furnishing elements that retain their technical and aesthetic qualities over time. The 3D Canneto structure, available in the Cross and Vein variants, enhances the depth of the inspiring material through light 3D grooves that vibrate in the light.

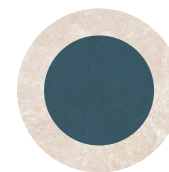

Original matchings. Calm and warm textures create harmonious environments expressing a unique character. The breadth of the range extends the application possibilities of the collection starting with the large, highly-scenically impacting 120x278 cm slabs, to be combined in a pleasant mix&match effect with other small-sized surface and wall tile effects.

About Ragno Travertino Collection

The two Vein and Cross looks reproduce the richness of detail of the inspirational material. The collection is featured by its depth of range, as for sizes, from large 120x120 slabs to 60x120 cm, and for finishes as well. The highly anti-slip outdoor surface is available in traditional thickness and XT20.

About Ragno Travertino Collection

Micro and macro. Large sizes with calibrated colors and changing shading effects, 3D structures that play with the reliefs of the surfaces are completed with the Losanga mosaic to obtain decorations with an essential design. All sizes are available in the Vein and Cross variants to further expand the compositional possibilities.
