About Dream

Dream is based on the fine and natural textures of an artisanal linen: one of the oldest fabrics in the world and still popular today in interior design due to its simple but sophisticated appearance.

A delicate and "drawn" interweaving crosses slender 120x278 cm slabs proposed in five shades: from a fresh bright white to shades with dusty hues that draw on the colours of the sky and natural environment.

O Dream

A collection that plays on the textures of linen and nature-inspired accents. Oversize porcelain stoneware slabs provide a background for the delicate forms of woods and gardens. Like painted canvases, interpreted by the hand of an artist, they bring elegance to any interior, urging the beholder to touch and admire them.

Soft moods merge with the architecture like a fabric in these large, stunning wallpaper-effect panels with all the advantages of stoneware (water-resistance, long life, and an easy-to-clean finish).

About Dream Collection

Luminescent material applications with a rich, tactile thickness accentuate the depth of variegated decorations, transforming ceramic surfaces into refined textures with glints of gold. Thanks to the Precious technology, decorations acquire a deep reflectance, with colors and textures becoming more vivid and bright. The raised golden effects elegantly enhance every detail.
